DETAILED ACTION

Response to Decision by the BPAI

The previous rejections of claims 2-7 have been reversed by the BPAI. Upon further consideration, a new ground of rejection is made as set forth below.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 6-7 are rejected under 35 U.S.C. 101 as being directed to non-statutory subject matter (Please see the MPEP 2106.01). The computer program product recited in claims 6 and 7 are not embodied within a computer readable medium. However, when functional descriptive material (such as a computer program product) is recorded on some computer readable medium, it becomes structurally and functionally interrelated to the computer and will be considered statutory. Further, as seen on page 6, lines 23-29 of the specification, the computer program product can be made available by a service provider via a communication network, indicating a carrier signal which is directed towards non-statutory subject matter.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which

Art Unit: 2621

applicant regards as the invention. In the claims, the phrase "a function of" was removed by amendment from the originally recited phrase "of a function of an average quantizing scale". The specification specifically states that this feature is included in the computation of the weighting factor. As a result of the removal of this phrase from the claim, it is not clear what subject matter the applicant regards as the invention.

Claim 2, recites the limitation "transcoding channel video" in line 12. There is insufficient antecedent basis for this limitation in the claim.

Claim 4, recites the limitation "transcoding channel video" in line 11. There is insufficient antecedent basis for this limitation in the claim.

Claim 5, recites the limitation "transcoding channel video" in lines 12-13. There is insufficient antecedent basis for this limitation in the claim.

Claim 6, recites the limitation "transcoding channel video" in line 8. There is insufficient antecedent basis for this limitation in the claim.
